EDUCATION

Saigon University Ho Chi Minh City, Vietnam
*Bachelor of Software Engineering — **GPA: 3.10/4.0*** Graduated: Mar 2026
Relevant Coursework: Database Management Systems, Data Warehousing, Data Structures & Algorithms, Probability & Statistics.

TECHNICAL SKILLS

Analytical & BI: Power BI (DAX, Data Modeling, Power Query), Cohort & Retention Analysis, Data Reconciliation, KPI Dashboarding, Excel.
Programming & ETL: Python (Pandas, NumPy, Seaborn, Matplotlib), Automated Data Cleaning, PHP (Laravel), RESTful APIs.
Databases & SQL: MySQL, PostgreSQL (Supabase), Star Schema Design, B-Tree Indexing, Window Functions, Multi-level CTEs.
Languages: Vietnamese (Native), English (Professional Working Proficiency — **TOEIC 4 Skills: L&R 735, S&W 300/400**).

DATA ANALYTICS PROJECT EXPERIENCE

TheLook eCommerce End-to-End Analytics Platform | *Python, MySQL, Power BI, DAX* *[GitHub] [Interactive Demo]*

- **ETL & Data Modeling:** Built an automated Python (Pandas) pipeline to clean and load 100,000+ raw e-commerce records into a MySQL Data Mart modeled as an optimized **Star Schema** (1 Fact, 4 Dimension tables).
- **BI & DAX Analytics:** Designed a 3-page Power BI dashboard utilizing 20+ advanced DAX measures (Time Intelligence, YoY/MoM Growth, Customer LTV, and Cohort Retention matrices) to monitor executive KPIs.
- **Business Impact:** Uncovered a 90-day post-purchase churn drop-off among high-value tiers and shipping delays over 5 days, providing data-backed grounds for marketing retargeting and SLA renegotiation.

Premier League Performance & Tactical SQL Engine | *Python, MySQL, Advanced SQL* *[GitHub] [Case Study]*

- **Data Pipeline:** Automated the extraction, cleaning, and normalization of multi-season Premier League match datasets using Python into a structured MySQL relational database.
- **Quantitative Analysis:** Authored **24 analytical SQL queries** using Window Functions (`DENSE_RANK`, `LEAD/LAG`, rolling averages) and CTEs to evaluate expected goals (xG) variance and squad consistency.

RELEVANT EXPERIENCE

BEPRO11 (Global Sports Data & Video Analytics) Ho Chi Minh City, Vietnam
Sports Data Analyst (Performance Analytics & Event Data) *Jun 2024 – Present*

- **Client Reporting & Storytelling:** Synthesize post-match event datasets into performance reports for club and agency clients, evaluating team form, tactical KPIs, and individual player efficiency.
- **Exploratory Data Analysis (EDA):** Query and analyze **800,000+ spatial-temporal data points** across 800+ matches using SQL and Python to uncover positional movement, passing, and shot conversion trends.
- **Data Pipeline & QA:** Normalize match logs into relational player databases (4-3-3, 4-2-3-1) and enforce QA protocols across 1,000+ events per game, maintaining **85%+ accuracy** within a 3.5-hour SLA.

DOTB (Education ERP & CRM Solutions) Ho Chi Minh City, Vietnam
CRM Data Operations & Backend Developer (ERP System) *Jul 2023 – May 2024*

- **Data Troubleshooting & Reconciliation:** Diagnosed and resolved **150+ production data anomaly tickets** across **two B2B and internal CRM/ERP systems** in MySQL, fixing corrupted records and relational errors.
- **Cross-Functional Data Support:** Collaborated daily with **BA, Customer Success, Sales, and Dev teams** to investigate reporting discrepancies, trace transaction logs, and restore accurate client metrics.
- **Database & System Maintenance:** Maintained core PHP and MySQL data-handling modules, implementing backend validation rules and query fixes to prevent recurring user-triggered data bugs.

ANALYTICS CONSULTING & LEADERSHIP

Vietnam Grassroots Football (VGF) Ho Chi Minh City, Vietnam
Data & Match Analytics Specialist *Jun 2025 – Present*

- **Federation CRM & Elo Rating System:** Work with the teams to manage detailed match data, multi-tier league datasets in VGF's CRM, structuring match logs to compute dynamic Elo-based rankings across amateur clubs.
- **Match Reporting:** Combine statistical match metrics with video footage to author data-backed tactical breakdowns and performance reviews, driving more clubs and partners to participate, audience engagement and federation growth.

Goal-Line (Sports Analytics Media Platform) Ho Chi Minh City, Vietnam
Founder & Internal Platform Architect *Jun 2023 – Present*

- **Database & Workflow Engineering:** Architect a full-stack web platform backed by a cloud relational database (**PostgreSQL**) to centralize scheduling and analytics tools across **4,600+ published pieces**.
- **Growth & Audience Analytics:** Analyze social media retention cohorts, reach, and engagement metrics to direct content strategy for a 30-member team, scaling the platform to **37,000+ active followers**.
